UTILITY PROVIDER	☐ Eversource ☐ United Illuminating (UI)
CUSTOMER CLASS / GRID EDGE	☐ Standard ☐ Standard + Grid Edge ☐ Underserved ☐ Underserved + Grid Edge ☐ Low-Income ☐ Low-Income + Grid Edge
BACKUP RESERVE PREFERENCE	☐ 20% (default) ☐ 30% ☐ 40% ☐ 50% Other: _____

Energy Storage Solutions is overseen by the Public Utilities Regulatory Authority (PURA), is paid for by electric ratepayers, and is administered by the Connecticut Green Bank, Eversource, and UI. Effective April 1, 2026, all new enrollments participate in the Connecticut Energy Storage Solutions Program under an Active Dispatch-only framework. The program provides an upfront enrollment credit and direct annual performance payments in exchange for allowing limited, scheduled utility access to the battery during grid stress events.

SECTION 1 Estimated Incentive Summary

(1) ENROLLMENT INCENTIVE TOTAL (one-time · applied as project discount at closing)	\$ _____
(2) EST. AVERAGE ANNUAL PERFORMANCE PAYMENT (paid directly to homeowner by utility)	\$ _____
(2) EST. 10-YEAR PERFORMANCE TOTAL	\$ _____
(2) PAYMENT SCHEDULE	Direct from Eversource/UI · 2x per year · within 8-10 weeks after each season · Not through Trinity

* Enrollment credit: Green Bank -> Trinity (~8 wks after approval) -> applied as project cost reduction. Performance paid directly to homeowner by utility. Some manufacturers may retain a portion - confirm with manufacturer. Estimates not guaranteed. Rates subject to annual PURA review. **Application deadline:** Submit within 6 months of interconnection approval. Reservation of Funds locks in both incentive amounts and the 10-year performance rate.

SECTION 2 Active Dispatch & Program Terms · Review each item together

By enrolling, the customer authorizes Eversource or UI to remotely dispatch energy from their battery during Active Dispatch events. Please review and initial each item together:

- ☐ **Active Dispatch Events:** The utility sends a signal to discharge stored energy to the grid automatically - no customer action required. Summer (June-Sept): ~30-60 events per season. Winter (Nov-Mar): up to 10 events. All events occur within the 12-9 PM window, typically ~3 hours each, with approximately 24 hours advance notice via the battery app (Tesla app or EnergyHub).
- ☐ **Backup Reserve Always Protected:** The battery will never discharge below the customer's set backup reserve (default 20%). A higher reserve preserves more backup power but may reduce the seasonal performance payment. Adjustable at any time via the manufacturer's app.
- ☐ **Storm & Outage Protection:** No dispatch events will be called during the two days preceding predicted severe weather or outage events. The customer's backup power is protected ahead of emergencies.
- ☐ **Per-Event Opt-Out Right:** The customer may opt out of any individual dispatch event at any time through the battery app. Opting out reduces the average kW contribution for that season and lowers the performance payment for that season - it does not exit the customer from the program.
- ☐ **Performance Payment - Direct from Utility:** Payments are issued directly by Eversource or UI to the homeowner - not through Trinity. Some manufacturers may retain a portion in exchange for managing dispatch participation. Confirm with your manufacturer.
- ☐ **No Penalty for Non-Participation:** Opting out of events - even all of them in a season - does not trigger a financial penalty or reclaim the enrollment credit. You simply earn less (or nothing) for that season and can resume participation at any time. To formally exit the program entirely, contact CT Green Bank directly.
- ☐ **Home Sale - Important:** (A) New homeowner transfers enrollment via the BESS Ownership Transfer Form - the 10-year term continues with no recoupment. (B) New homeowner declines - Program Administrators will seek to recoup the enrollment incentive. Contact CT Green Bank before listing your home.
- ☐ **Data Sharing:** Customer authorizes Program Administrators to access battery and energy data - including usage, production, and opt-in/opt-out status - solely to administer the program and calculate payments.
- ☐ **Program Term:** Performance incentive period is up to 10 years from the accepted enrollment date. After 10 years, payments end; the battery continues to operate for the customer's full benefit.
- ☐ **Federal Tax Credit Status:** The 30% federal residential tax credit (Section 25D) expired December 31, 2025 and is not available for cash or loan-financed battery purchases in 2026. This does not affect Connecticut Energy Storage Solutions Program incentive eligibility. Customers are encouraged to consult a qualified tax professional regarding any potential federal tax credit eligibility for their specific financing arrangement. Trinity Solar does not provide tax advice and cannot guarantee any tax credit eligibility.
- ☐ **Quality Assurance Field Inspection:** The Program Administrators (CT Green Bank, Eversource, and/or UI) reserve the right to conduct a field inspection of the completed and interconnected battery system on a random basis. Inspections may cover: battery communication and dispatch readiness, equipment verification, safety, workmanship, and applicable code compliance. Trinity Solar is required to allow Program Administrator representatives access to the installation. **Customers may decline the inspection if they choose.** If inspection issues are identified, Trinity Solar is required to contact the customer within 7 days to arrange a remedy appointment.

SECTION 3 Enrollment Election

After reviewing the Connecticut Energy Storage Solutions Program with a Trinity Solar consultant, the customer elects:

☐ **YES - Enroll in Connecticut Energy Storage Solutions Active Dispatch Program**

Customer authorizes Trinity Solar to submit the Energy Storage Solutions enrollment application on their behalf. Customer understands they must also complete in-app enrollment through their battery manufacturer's app (Tesla app -> Virtual Power Plant, or EnergyHub) after installation to activate performance incentives. Customer has reviewed and understands the non-participation and home sale terms in Section 2.

☐ **NO - Decline Connecticut Energy Storage Solutions Enrollment at This Time**

Customer has been informed of the program and declines enrollment. Battery system proceeds as contracted. Customer may be eligible to enroll in the future - contact Trinity Solar or energystoragect.com. **Customer signature below is required to confirm they were informed and chose to decline.**

Notice: This document is a disclosure and acknowledgment only - not an official Connecticut Energy Storage Solutions Program enrollment. Official enrollment is submitted by Trinity Solar through the Energy Storage Solutions Enrollment Platform after installation, and completed by the customer through their battery manufacturer's app. Program eligibility is subject to approval by CT Green Bank, Eversource, and UI. Incentive estimates are illustrative and not guaranteed. Program rates are subject to annual PURA review. Home sale recoupment terms are governed by the Energy Storage Solutions Program Manual and Universal Terms & Conditions in effect at the time of enrollment.
